

Seminar for promoting young researchers' leadership

**- Research for sustainable development of
emerging technologies and biomaterials-**

13:00–15:30 May 27th (Wed), 2015

Meeting room (会議室) @“2” floor of Building #15
Fac Pharm Sci, Noda Campus, TUS

Strategies for developing international core of excellence for sustainable development of emerging technologies and biomaterials will be discussed with young researchers as speakers.

1 Introduction

Dr Masakazu UMEZAWA (Tokyo University of Science)

2 Surface modifications and size of silica nanoparticles affect their uptake into cells and pulmonary toxicity

Dr Vranic SANDRA (University of Manchester, UK)

3 Developmental toxicity of nanoparticle on chicken embryo

Dalia SAMAK (Damanhour University, Egypt)

4 Sustainable development of emerging technologies

Professor Gaku ICHIHARA (Tokyo University of Science)

5 Discussion
